UIMPROVE provides a common language and approach

A common problem in organisations is that different individuals and departments adopt their own approaches as to how they go about improving things. **UIMPROVE** clients say that one of the greatest advantages is that everyone works in the same way and the knowledge is shared right across the organisation.

UIMPROVE pulls together all the activity in your organisation

Organisations that use **UIMPROVE** find that it helps them to get a grip on all the work that needs to be done. Every team has an auditable list of projects linked to the corporate plan. This leads to everyone knowing what's happening across the organisation and better corporate governance. If you work in an industry where your organisation is audited or inspected, **UIMPROVE** will help you to get an excellent score.

UIMPROVE builds capacity in-house

Many approaches to organisational improvement rely on internal experts or external consultants. By contrast, **UIMPROVE** unleashes the talent of the whole organisation. A wide range of people can participate in projects. **UIMPROVE** training is accessible to all. Organisations that take Licences find their trainers become excellent consultants too.

It's our approach

One of the things we have noticed with clients who have truly implemented **UIMPROVE**, is that they always refer to it as 'our approach'. This is because **UIMPROVE** is a means of improving any organisation - this allows each individual organisation to develop their own character.

It's cost-effective

UIMPROVE has a number of options to suit your particular circumstances. Large organisations can buy a Licence to run **UIMPROVE** training in-house.
